

RYAN RUDD

Software engineer. Entrepreneur.
Wellington, Florida | CS student at FAU

PROFILE

I'm 18, born in Wellington, Florida, and come from an Italian family. I study Computer Science full-time at FAU.

I've built startups, worked as a software engineering intern, and consulted on business growth. My goal is to own a large-scale SaaS company.

SKILLS

AI engineering · Software engineering · Web design · Automation · Business operations · Growth consulting · Behavioral psychology · SaaS development

CURRENT VENTURES

WarnBird

FOUNDER

An email safety platform that detects signs of scams, account takeover, and identity theft through ongoing inbox monitoring, alerts, and actionable guidance.

WrenchDay

FOUNDER

A repair shop management platform that brings work orders, estimates, digital inspections, and customer communication into one workflow.

AviateOps

CO-FOUNDER

A flight school operations platform connecting aircraft scheduling, dispatch, readiness, billing, and renter self-service across daily operations.

Pichardo Rudd

CO-FOUNDER

A capital and advisory firm helping business owners secure funding and structure financing for growth, expansion, and acquisitions.

CURRENT PROJECTS

Deluxe Fine Art

IN PROGRESS

Building an art inventory and management system, plus an automation platform.

EXITED VENTURES

Practiwise

Exited

An AI interview coaching platform that analyzes facial and behavioral patterns to deliver personalized feedback during practice interviews.

AthleteUnseen

Exited

Built a student athlete publication and expanded it into a recruiting-focused social platform for showcasing talent, sharing highlights, and gaining exposure.

KeyFolio

Exited

An OpenRouter billing platform that assigns API keys and usage costs to clients, turning AI spend into clear, client-ready invoices.

IGFX

Exited

A photo editing platform built before the AI boom, giving social media creators tools to relight images and transform scenery.

EXPERIENCE

Software Engineering Intern

GDSI | May-August 2026

Contributed to software optimization across GDSI's synchronization, import, and export tools. Developed data-transfer automation scripts and gained hands-on experience with iManage document management workflows.

Automation Development

Nourishment Resource Center | Formerly 365 Wellness Solutions

Developed client portals, payment workflows, and booking systems that automated core business operations, reduced manual administration, and saved the owner several hours each week.

Growth Consultant

Sun Auto Electric | 2024-Present

Supported business growth through social media planning and Yelp automation. Currently assisting with a capital raise of just under \$500,000 to fund the company's expansion.

Growth Consultant

MyFastRX | 2024-Present

Contributed to marketing and customer acquisition strategy, helping shape how the business reaches prospective customers and attracts new clients.

Natural Gas Pipeline Visualizer

Titan Land Co. | Short-term project

Contributed to a natural gas pipeline visualization tool supporting land surveying for AI data center development, making pipeline information easier to interpret during site planning.

Freelance Web Designer

Vettair | 2021-2025

Designed and developed client websites across industries, translating business requirements into tailored layouts, navigation, and customer-facing experiences.
